

### OBJECTIVE

My objective or personal mission is to help improve my patients' lives by using both conventional and integrative approaches. Through my patient care and consultative practice as well as speaking engagements on various health-related topics, I strive to bring good health and healing to my patients and other community members.

Honor Society of Phi Kappa Phi, and Golden Key Honor Society

#### **Phoenix College; Phoenix, AZ**

Dean's List, La Sociedad Nacional Hispanica (Spanish class honors)

Sigma Delta Mu (National Hispanic Honors Society)

### EMPLOYMENT EXPERIENCE

#### **Julie Rake Healing; Scottsdale, Arizona**

*Physician Assistant; September 2016 to Present*

Integrative medicine is the intelligent combination of western medicine combined with evidence-based complementary and alternative medicine. I specialize in "Integrative Mental Health," which seeks to identify the root causes of mental and emotional illness and suffering and explores all avenues to heal and resolve them.

#### Individual Patient Consults

Integrative consults differ from the typical medical model. The initial visit is a 1 to 2-hour consultation that gathers data from the patient's cultural, social, spiritual/religious, family, and medical history. Integrative medicine utilizes standard conventional medicine and treatments when necessary and utilizes herbals, supplements, diet, mind-body techniques, and other therapies when deemed beneficial.

#### Group Patient Visits

These 90-minute group visits allow the provider and patient to delve more deeply into the root causes of illness and suffering, rather than simply medicating the symptoms of disease processes. The groups also offer peer support and foster a caring, empathic environment that nurtures healing. Topics of discussion have included: Reducing Anxiety and Stress: Integrative Medicine for Self-Care, Integrative Weight Loss, Integrative Insomnia, and Integrative Menopause.

### EMPLOYMENT EXPERIENCE (CONTINUED)

**Center for Integrative Healing & Wellness; Carefree, AZ**  
*Physician Assistant; January 2021 to January 2024*

#### Marma Therapy

Marmapoint therapy emerged over 5000 years ago in the Ayurvedic system of healing. It is considered an energy healing practice and focuses on the manipulation of prana (vital energy) in the body. Marma therapy influenced the development of Chinese acupuncture. Marma masters, called "Marmani" were often physicians who used this knowledge to help their patients heal. This focused therapy is specifically called "East Indian Head Acupressure." This powerful modality induces deep states of relaxation and profound tranquility both physically and psychologically. Marma therapy allows healing of deeply held trauma patterns stored in the physical, energetic, mental, and subtle bodies.

**Chopra Health Retreat at Civana Wellness Resort & Spa; Carefree, AZ**  
*Medical Provider & Medical Team Manager; January 2021 to December 2023*

Deepak Chopra™, M.D.'s "Perfect Health" program formerly at the Chopra Center in Carlsbad, California, has moved to the Arizona Sonoran Desert and is called "The Health Retreat at Civana." This intensive wellness retreat teaches the centuries-old wisdom and healing methods of Ayurveda. At this program, I coordinate all duties of the medical team, provide medical care to the participants, and deliver talks on stage during the program. This multi-day event is a powerful cleansing, healing & rejuvenating program and is an authentic "Panchakarma" purification experience handed down through the millennia.

**Page Family Practice; Tempe, Arizona**

*Physician Assistant; September 2005 to May 2015*

Obtained medical histories of family care patients, examined patients, diagnosed injuries and illnesses, provided treatment in accordance with their diagnosis, ordered and interpreted laboratory data and x-rays, and prescribed medications when necessary.

**James Dearing, D.O.; Phoenix, Arizona**

*Physician Assistant; July 2003 to July 2005*

Obtained medical histories of family care patients, examined patients, diagnosed injuries and illnesses, provided treatment in accordance with their diagnosis, ordered and interpreted laboratory data and x-rays, and prescribed medications when necessary.

**Clinical Rotations; Arizona**

*Physician Assistant Resident; July 2002 to July 2003*

Detailed below.

**Alta Vista Veterinary Hospital; Phoenix, Arizona**

*Veterinary Technician; February 1991 to August 1998*

Provided for the health and well-being of animals through specialized knowledge of animal behavior and care, assisted with surgical, laboratory, and nursing procedures when necessary.
